112dB updates Redline Monitor to 1.0.3

112dB announces that Redline Monitor, the high-quality near-field monitor simulation for headphones, has been updated to version 1.0.3. This maintenance release applies to both the retail and the trial version.

What's new?

- Dim attenuation switchable from -3dB (as in previous versions) to -6dB to prevent clipping.
- Additional *Easier Readability* skin for visually impaired users.
- Option to disable popup tooltips.

What's fixed?

- Pro Tools compare functionality didn't work.
- Plugin crash when deinserted on some setups.
- Fixed loading problem in Live 8 on Vista.
- Numerical value entry slowed down or hanged some Vista systems.

Redline Monitor 1.0.3 is a free download for registered users.

Availability

Redline Monitor is available in RTAS/VST format for Windows XP/Vista and RTAS/AU/VST Universal Binary format for Mac OS X 10.4 (Tiger) and up. Redline Monitor is sold exclusively from the 112dB online store at `http://112dB.com/store` for €99/$99.
